

# A GREAT SPACE SAVER IN THE SHOP A GREAT TIME SAVER ON THE JOBSITE

## FROM THIS:

### A FULL-SIZE CUTTING TABLE

The STOWAWAY features a generous work surface of 72 1/4" x 96 1/2" [1835 x 2450 mm] with a rugged, long-lasting felt top designed to reduce vacuum stick when used for cutting glass or other nonporous materials. High-strength construction provides durability without excess weight. Crossed support legs ensure a rigid and stable, 35" [889 mm] high work surface with a 500 lb. [225 kg] load capacity.

## TO THIS:

### AN EASY-TO-USE TILT TABLE

The scissor-action tilt design of the STOWAWAY floats the pivot point forward as the top lifts, providing nearly effortless manual tilt... without the extra weight of a counter-balanced system. Bronze pivot bushings and nylon washers make movements smooth and quiet. Rubber rollers support glass, laminate or other sheet materials when tilted and flip out of the way when not needed.

### THE STOWAWAY TILT TABLE

Fold up the base section, pull back the stabilizing arm and the base is locked into place... ready to stow or roll. With its compact, 25 3/4" [656 mm] deep x 79 3/4" [2028 mm] high profile, the STOWAWAY is easy to stow against a wall, roll along narrow aisles, slip through doorways, and fit on freight elevators. Weighing only 337 lbs. [153 kg], it can even be lifted into the back of a truck for transport to a jobsite. Used as a rack for glass or other sheet materials, the STOWAWAY can be loaded from the front or from the side! Sheets roll easily and gently across the rubber support rollers.

Some assembly required.
